CONTENTS TO VOLUME 29

PART 1 18 JULY 1967

Linear theory of rotating stratified fluid motions. V. BARCILON and J. PEDLOSKY *page* 1

On the oscillatory instability of a differentially heated fluid loop. PIERRE WELANDER 17

Stability of plane Poiseuille flow to periodic disturbances of finite amplitude in the vicinity of the neutral curve. CHAIM L. PEKERIS and BORIS SHKOLLER 31

Detached shear layers in a rotating fluid. R. HIDE and C. W. TITMAN 39

Imploding shocks and detonations. ROBERT L. WELSH 61

Balance of turbulence energy in the region of jet-flow establishment. SEDAT SAMI 81

Transition in oscillating boundary layer flows. H. J. OBREMSKI and A. A. FEJER 93

The dynamics of turbulence near a wall according to a linear model. GERALD SCHUBERT and G. M. CORCOS 113

The motion of a fluid due to a moving source of heat at the boundary. A. DAVEY 137

The scalar spectrum in the viscous-convective subrange. JAMES O. NYE and ROBERT S. BRODKEY 151

Shear layers in a rotating fluid. D. JAMES BAKER 165

Formation of vortex rings from falling drops. DAVID S. CHAPMAN and P. R. CRITCHLOW 177

Effect of longitudinal surface curvature on boundary layers. RODDAM NARASIMHA and S. K. OJHA 187

FILM REVIEWS

Boundary Layer Control, by C. D. HAZEN 200

Rheological Behaviour of Fluids, by H. MARKOVITZ 202

Magnetohydrodynamics, by ARTHUR SHERCLIFF 202

Low Reynolds Number Flow, by SIR GEOFFREY TAYLOR 204

Channel Flow of a Compressible Fluid, by DONALD COLES 207

PART 2 11 AUGUST 1967

Effect of viscosity on gravity waves and the upper boundary condition. MICHAEL YANOWITCH 209

The stability of a stratified fluid. J. B. HINWOOD 233

Thermally induced boundary-layer flows in a rotating environment. N. RILEY 241

Visualization of an incompressible wake with base bleed. C. J. Wood *page* 259

Two-dimensional incompressible fluid jet penetration. D. F. Hopkins and J. M. Robertson 273

The determination of fluctuating velocity in air with heated thin film gauges. B. J. Bellhouse and D. L. Schultz 289

The shape of a diffracting shock wave. B. W. Skews 297

The heated laminar vertical jet. R. S. Brand and F. J. Lahey 305

A non-linear theory for a fully cavitating hydrofoil in a transverse gravity field. Bruce E. Larock and Robert L. Street 317

The effect of heating rate on the stability of stationary fluids. I. G. Currie 337

Hypersonic weak-interaction similarity solutions for flow past a flat plate. William B. Bush and Arthur K. Cross 349

A theory of water-bells. Jean-Yves Parlange 361

An underwater explosive shock gun. A. Coombs and C. K. Thornhill 373

The formation of a dip on the surface of a liquid draining from a tank. Barry T. Lubin and George S. Springer 385

Laminar free convection in boundary layers near horizontal cylinders and vertical axisymmetric bodies. D. A. Saville and S. W. Churchill 391

Magnetohydrodynamic flow at a rear stagnation point. S. Leibovich 401

Reviews
